**PUBLIC ADVISORY COMMITTEE
FOR TRADEMARK AFFAIRS**

Agency: Patent and Trademark Office, Commerce

Action: Notice of Committee Charter Amendment

Summary: In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), and after consultation with GSA, it has been determined that an amendment of the charter of the Public Advisory Committee for Trademark Affairs is in the public interest in connection with the performance of duties imposed on the Department by law. The charter amendment was signed on December 3, 1990.

The charter has been amended as follows to: (1) broaden the topics that the Committee may address to include international trademark law, (2) allow the membership of the Committee to be drawn from a wider range of the trademark community rather than solely from the regular, associate and supplementary membership of the United States Trademark Association (USTA), (3) increase the number of members on the Committee from 15 to 18, (4) provide for the direct selection of the members and appointment of the chairman of the Committee by the Assistant Secretary and Commissioner of Patents and Trademarks rather than by the president of the USTA, and (5) set the term of membership at two years.

For Further Information Contact: Lynne Beresford, Committee Control Officer, Office of the Assistant Commissioner for Trademarks, U.S. Patent and Trademark Office, Washington, D.C. 20231, telephone: (703) 557-7464, or Jan Jivatodi, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-4217.

Supplementary Information: The Committee was first established in September 1970, and the latest charter renewal was signed on April 4, 1990. The charter amendment was approved on December 3, 1990, and provides for the following:

(1) The amendment broadens the objectives and duties of the Committee to specifically embrace international trademark law. The previous charter permitted the Committee to advise the Patent and Trademark Office only on the steps which could be taken to increase the efficiency and effectiveness of the administration of the Trademark Act and to provide a continuing source of knowledge from the private sector to the Government. Given the increased interest within the trademark community and the Patent and Trademark Office in international trademark law, especially in the Madrid Protocol and harmonization, it is desirable that the charter refer explicitly to international trademark law.

(2) Section 5(b)(2) of the Federal Advisory Committee Act requires that the membership of advisory committees be "fairly balanced in terms of the points of view represented...." The amendment furthers that goal by permitting the membership to be drawn from a wide range of the trademark community including users of the public search room, academia, members of the public at large, and the business community.

(3) The amendment increases the number of members on the Committee from 15 to 18. The increase was needed to permit additional members, from different sectors of the trademark community, to be added to the Committee without having to displace any of the current Committee members.

(4) Section 5(b)(2) of the Federal Advisory Committee Act requires that "the membership be fairly balanced in terms of the points of view represented...." The amendment furthers that goal by permitting the chairman to be appointed, and the members of the Committee to be selected by the Assistant Secretary and Commissioner of Patents and Trademarks.

(5) The charter of the Public Advisory Committee for Trademark Affairs did not set terms for members. In order to promote more orderly administration of the Committee, the amendment sets the terms of the members at two years. Members will serve at the discretion of the Assistant Secretary and Commissioner of Patents and Trademarks. Appointments, when vacancies occur, shall be for the remainder of the unexpired term.

(182) Interlocutory Decisions by the Trademark Trial and Appeal Board

Only final decisions of the Trademark Trial and Appeal Board are subject to judicial review. Some confusion may exist in *inter partes* trademark proceedings as to whether certain decisions of the Board are "final" for purpose of judicial review.

An example where confusion may arise is a case in which (1) an opposition is filed, (2) applicant counterclaims for cancellation of a registration relied upon by an opposer, and (3) the Board renders a decision (generally on summary judgment) on the opposition, but sets the counterclaim for trial. Under these circumstances, there is no final order of the Board, because a decision has not been entered on the counterclaim.

The party losing the opposition may feel compelled to seek judicial review within two months of the Board's decision to "preserve" its rights. But such an appeal appears to be premature under *Copeland's Enterprises, Inc. v. CNV, Inc.* 887 F.2d 1065, 12 USPQ2d 1563 (fed. Cir. 1989) (in banc). *Copeland's* is not the only appeal which has been dismissed because it was taken from an interlocutory decision of the Board. See *Cortex Corporation v. W.L. Gore & Associates, Inc.*, No. 91-1016 (Fed. Cir. January 14, 1991)(unpublished), and *Kellogg Co. v. Pack'em Enterprises, Inc.*, No. 90-1336 (Fed. Cir. Sept. 27, 1990)(unpublished).

In an effort to (1) minimize disruption in proceeding pending before the Board, (2) eliminate unnecessary appeals and filing of civil actions, only to have the appeal or civil action dismissed as premature, and (3) provide some certainty to parties and their attorneys as to when an appeal is timely, the Board will, when resolving a merits issue prior to final judgement, generally indicate that it has entered an "interlocutory" order in the proceeding and further set the time for seeking judicial review of the "interlocutory" order to expire two months from the date a final order is entered in the proceeding.

Patent and Trademark Office 37 CFR Part 10 Cross Appeals in Patent and Trademark Office Disciplinary Proceedings

Agency: Patent and Trademark Office, Commerce.

Action: Notice of proposed rulemaking.

Summary: The Patent and Trademark Office (PTO) proposes to amend its rules of practice in practitioner disciplinary proceedings. The proposed rule change provides for a time period for a party to a disciplinary proceeding to file a cross-appeal, after the other party (the respondent or the Director of the Office of Enrollment and Discipline) to the proceeding has appealed from an initial decision of the administrative law judge to the Commissioner. Currently, PTO rules do not provide for a time period for filing a cross-appeal in a disciplinary case. A party in a disciplinary case may be interested in appealing only if the other party has appealed. Allowing a time period for filing a cross-appeal will give parties to disciplinary cases more flexibility after an initial decision by the administrative law judge. A party need not file a contingent appeal simply to preserve rights in the event the other party files an appeal.

Dates: Written comments must be received on or before Aug. 20, 1993 to ensure consideration. An oral hearing will not be conducted.

Addresses: Address written comments to Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231, marked to the attention of Fred E. McKelvey, Solicitor. Written comments will be available for public inspection in suite 918, on the 9th floor of Crystal Park II, located at 2121 Crystal Drive, Arlington, Va.

For Further Information Contact: Fred E. McKelvey by telephone at (703) 305-9035 or by mail marked to his attention and addressed to Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: Pursuant to 37 CFR §10.132 *et seq.*, the Director of the Office of Enrollment and Discipline within the PTO may initiate a disciplinary proceeding against a practitioner. If the proceeding is contested by the practitioner and the Director continues to prosecute, an administrative law judge for the Department of Commerce enters an initial decision which includes findings of fact, conclusions of law and an order. 37 CFR §10.154.

Either party to the proceeding may appeal from the initial decision of the administrative law judge to the Commissioner within thirty (30) days of the date of the decision. 37 CFR §10.155(a). However, §10.155(a) does not currently address the filing of a cross-appeal. That is, no period of time is specified for the non-appealing party to file a cross-appeal.

With regard to interference proceedings, 37 CFR §1.304(a) addresses the filing of cross-appeals by stating in pertinent part that:

the time for filing a cross-appeal [to the Court of Appeals for the Federal Circuit] or cross-action [in a district court] expires (1) 14 days after service of the notice of appeal or the summons and complaint or (2)

two months after the date of decision of the Board of Patent Appeals and Interferences, whichever is later.

OTHER CONSIDERATIONS

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the proposed rule change will not have a significant economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principle impact of the proposed change is to provide a time period to file a cross-appeal in a PTO disciplinary proceeding.

The PTO has determined that the proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than \$100 million. There will be no major increase in costs or prices for consumers; individuals; industries; Federal, state or local government agencies; or geographic regions. There will be no significant effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The PTO has also determined that this notice has no federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The proposed rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no record keeping or reporting requirements within the coverage of the Act are placed upon the public.

List of Subjects in 35 CFR Part 10

Administrative practice and procedure, Inventions and patents, Lawyers, Reporting and record keeping requirements.

For the reasons set out in the preamble, and pursuant to the authority contained in 35 U.S.C. 6, the PTO proposes to amend 37 CFR part 10 as follows, wherein deletions are indicated by brackets ([]) and additions by arrows (▶▶):
PART 10-REPRESENTATION OF OTHERS BEFORE THE PATENT AND TRADEMARK OFFICE

1. The authority citation for 37 CFR part 10 would continue to read as follows:

Authority: 5 U.S.C. 500; 15 U.S.C. 1123; 35 U.S.C. 6, 31, 32, 41.

2. Section 10.155 is proposed to be amended by revising paragraph (a) to read as follows:

§10.155 Appeal to the Commissioner.

(a) Within thirty (30) days from the date of the initial decision of the administrative law judge under §10.154, either party may appeal to the Commissioner. ▶▶ If an appeal is taken, the time for filing a cross-appeal expires (1) 14 days after service of the appeal or (2) 30 days after the date of the initial decision of the administrative law judge, whichever is later. ◀◀ An appeal ▶▶ or cross-appeal ▶▶ by the respondent will be filed with the Director in duplicate and will include exceptions to the decisions of the administrative law judge and supporting reasons for those exceptions. If the Director files the appeal ▶▶ or cross-appeal ▶▶, the Director shall serve a copy of the appeal ▶▶ or cross-appeal ▶▶. Within thirty (30) days after receipt of an appeal ▶▶, cross-appeal ▶▶ or copy thereof, the other party may file a reply brief, in duplicate with the Director. If the Director files the reply brief, the Director shall serve a copy of the reply brief. Upon the filing of an appeal ▶▶, cross-appeal, if any, ▶▶ and [a] reply brief ▶▶, if any, the Director shall transmit the entire record to the Commissioner.

(185) Request for Information to Aid in the Implementation of the Recordation Requirements of Section 8 of the Fastener Quality Act

Agency: Patent and Trademark Office, Commerce

Action: Notice; Request for Information

Summary: The Patent and Trademark Office (PTO) is seeking information concerning alphanumeric designations currently in use by manufacturers or distributors of industrial fasteners. These alphanumeric designations may be used to signify the physical characteristics, strength, chemical content, size or other information about the fastener upon which they appear or they may be used as common law trademarks to identify and distinguish the manufacturer or distributor of such fasteners. The PTO needs information concerning these alphanumeric designations in order to administer the proposed fastener recordal system published on Aug. 17, 1992, at 57 F.R. 37060, 37061 to implement the requirements of Section 8 of the Fastener Quality Act, Public Law 101-592. Therefore, the PTO is requesting from fastener industry associations, standards bodies, or individual manufacturers or distributors, any general or specific information available concerning alphanumeric designations currently in use within the industry, whether as unregistered trademarks, as marks required by a standard, or for any other purpose.

Date: Comments should be submitted on or before Sept. 27, 1993. Comments received after this date will be considered if possible.

Addresses: All comments concerning alphanumeric designations should be addressed to Lynne G. Beresford, Trademark Legal Administrator, Commissioner of Patents and Trademarks, Washington, D.C. 20231, telephone number (703) 305-9464.

For Further Information Contact: Lynne G. Beresford, Trademark Legal Administrator, (703) 305-9464.

Supplementary Information: In 1990, Congress enacted the Fastener Quality Act, Public Law 101-592 (the Act) to protect public safety, deter introduction of non-conforming fasteners into commerce, improve the tracing of fasteners used in critical applications, and provide customers with greater assurance that fasteners meet stated specifications. The Act requires that certain fasteners sold in commerce conform to the specifications to which they are represented to be manufactured; provides for accreditation of laboratories engaged in fastener testing; and requires the inspection, testing and certification (in accordance with standardized methods) of fasteners covered by the Act.

Section 8 of the Act prohibits offering fasteners for sale that are required by an applicable standard or specification to bear a raised or depressed insignia identifying the manufacturer or private label distributor unless such manufacturer or distributor has complied with the requirements of a program of the Secretary of Commerce for the recordation of such insignia in order to ensure that the fasteners can be traced to the manufacturer or distributor.

The program for recordation of fastener insignias, established by the Secretary of Commerce and administered by the Patent and Trademark Office, will allow the owner of a mark, which is the subject of a duly filed trademark application or registration, to apply for recordal of that mark as its fastener insignia. However, if the manufacturer or private label distributor does not wish to use a trademark as its fastener insignia, it will be permitted to apply for a unique alphanumeric designation for that purpose.

The PTO wants to ensure that it does not inadvertently issue an alphanumeric designation that is either already in use by a manufacturer or distributor as its identifying insignia, or a designation already in use by the industry to signify the physical

characteristics, strength, chemical content, size or other information about the fastener. For that reason, the PTO is requesting from fastener industry associations, standards bodies, or individual manufacturers or distributors, any general or specific information available concerning alphanumeric designations currently in use within the industry, whether as unregistered trademarks, as marks required by a standard, or for any other purpose. The PTO does not need information concerning specific registered alphanumeric trademarks, as that information is readily available from the PTO's database.

**Request for Comments on Intellectual Property Issues
Involved in the National Information Infrastructure
Initiative**

Agency: Patent and Trademark Office, Commerce

Action: Notice of hearing and request for public comments

Summary: The Working Group on Intellectual Property of the Information Policy Committee of the National Information Infrastructure (NII) Task Force is developing proposals for protecting works disseminated via the National Information Infrastructure from unauthorized use. To ensure that the Working Group's proposals are based on the views of all interested parties, the Working Group will hold a hearing on the intellectual property issues involved in the National Information Infrastructure initiative. Written comments may also be submitted.

Dates: The public hearing will be held on Nov. 18, 1993, from 9:00 a.m. to 5:00 p.m. Requests to attend the hearing or to present oral testimony at the hearing should be received on or before Nov. 8, 1993. Written comments of those persons offering testimony at the hearing that are related to the testimony should be submitted on or before Nov. 8, 1993. All other written comments are due on or before Dec. 10, 1993.

Address: The hearing will be held in Marriott's Crystal Forum, a part of the Crystal City Marriott Hotel located in the Underground, 1999 Jefferson Davis Highway, Arlington Va., Written comments and requests to present oral testimony should be submitted to the Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, Box 4, Washington, D.C. 20231, marked to the attention of Terri A. Southwick, Attorney-Advisor, Office of Legislation and International Affairs. Written comments and a transcript of the hearing will be made available for public inspection in Room 902 of Crystal Park Two, 2121 Crystal Drive, Arlington, Va.

For Further Information Contact: Terri A. Southwick by telephone at (703) 305-9300 or by telefax at (703) 305-8885 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, Box 4, Washington, D.C. 20231.

Supplementary Information: The National Information Infrastructure is a system of high-speed telecommunications networks, databases, and advanced computer systems that will make electronic information and entertainment products more widely available and accessible to the public than ever before. This increased availability and accessibility will dramatically affect the way information and entertainment products are created, marketed and delivered throughout the world. Consequently, the commercial viability of the NII hinges not only upon effectively promoting and encouraging use of the NII by all types of users, but also on implementing standards and policies for the NII in a manner that assures that the owners of products disseminated through the NII retain sufficient control over these products to prevent unauthorized use. In this regard, it is essential that the public and private sectors collaborate to ensure that the interests of owners and users of intellectual property are adequately considered in any standards and policies that are established.

On Feb. 22, 1993, the President announced his plan to create a White House Information Infrastructure Task Force (IITF) to work with Congress and the private sector to develop comprehensive telecommunications and information policies aimed at articulating and implementing the Administrations's vision for the NII. The IITF is chaired by the Secretary of Commerce and consists of three committees—the Telecommunications Policy Committee, the Information Policy Committee, and the Applications Committee. Within the Information Policy Committee there are three working groups—The Working Group on Intellectual Property Rights, the Working Group on Privacy, and the Working Group on Federal Information.

The Working Group on Intellectual Property Rights, which is chaired by the Assistant Secretary of Commerce and Commissioner of Patents and Trademarks, was established to resolve issues of concern to copyright and other intellectual property owners regarding the distribution of their works via the NII. The Working Group's mission is to help develop the NII in a manner that will ensure the integrity of intellectual property rights, make the wealth of information and entertainment products more widely available and accessible than ever before, and provide economic incentives to intellectual property rights owners so that they will make their products available through the NII.

The Working Group solicits testimony and written comments addressing one or more of the following issues:

TMIs the existing copyright law adequate to protect the rights of those who will make their works available via the NII? What statutory or regulatory changes, if any, should be made?

TMDo the existing fair use provisions of the copyright law adequately accommodate the interests of users of the works available via the NII? What statutory or regulatory changes, if any, should be made?

TMShould standards or other requirements be adopted for the labeling or encoding of works available via the NII so that copyright owners and users can identify copyrighted works and the conditions for their use?

TMShould standards be established to encourage or require the intercommunication or exchange of information and the interoperability of the different types of computer software and systems supporting or utilizing the NII?

TMShould a licensing system be developed for certain uses of any or all works available via the NII? If so, should there be a single type of licensing or should the NII support a multiplicity of licensing systems?

TMAre their technical means for preventing unauthorized reproduction or other unauthorized uses of copyrighted works that should be mandated or required to comply with certain standards (similar to the serial copying controls required in digital audio recording devices and digital audio interface devices under the Audio Home Recording Act of 1992)?

TMWhat types of educational programs might be developed to increase public awareness of intellectual property laws, their importance to the economy, and their application to works available via the NII?

The public is invited to submit written comments, and any appropriate supporting material, on the issues set forth above or any related issues. Those submitting comments must include their name and or professional affiliation.

Iraqi Sanctions Regulations

On Jan. 18, 1991, the Department of the Treasury, Office of Foreign Assets Control (OFAC), published the Iraqi Sanctions Regulations (Regulations) (31 CFR Part 575). 56 Fed. Reg. 2112. The regulations implement Executive Orders 12722 (Aug. 2, 1990) and 12724 (Aug. 9, 1990) relating to certain property and transactions in which the Government of Iraq and persons in Iraq may have an interest.

It appears that the provisions of the Executive Orders and Regulations prohibit transactions relating to the filing or prosecution of applications for patents or for registration of trademarks, where an Iraqi interest is involved. The prohibited trans-

actions, however, may be authorized by a specific license issued pursuant to the procedures described in Section 575.801 of Subpart H of the Regulations.

This notice is intended to alert practitioners and applicants to the prohibitions which may apply to matters before the Patent and Trademark Office, (PTO) if Iraqi interests are involved. This notice is further intended to advise that where such interests or potential interests come to the attention of the PTO, an appropriate specific license from OFAC may be required.

**(188) Notice Regarding Patent and Trademark Rights
in the Russian Federation**

Representatives of the Russian Federation met with representatives of the U.S. Government on Monday, February 24, 1992, at the U.S. Patent and Trademark Office. The Russian delegation sought information about the operation of the U.S. patent and trademark systems and provided information about the treatment of inventions, industrial designs, utility models, trademarks, service marks, and appellations of origin in the Russian Federation.

Following is the text of a statement from the Chairman of the Committee for Patents and Trademarks (ROSPATENT), outlining the status of industrial property protection in the Russian Federation and the plans for the future.

INFORMATION

by the Committee for Patents and Trademarks

Due to the fact that the draft laws on patents and on trademarks were approved in the first hearing by the Supreme Soviet of the Russian Federation and taking into account numerous questions of domestic inventors, foreign patent offices and patent attorneys, the Committee for Patents and Trademarks (Rospatent) of the Ministry of Science, Higher School and Technical Policy of the Russian Federation hereby informs that:

1. Until the Patent Law and Trademark Law become effective, the provisions of the USSR Laws on Inventions, Industrial Designs and Trademarks, that are adopted as the normative base by the States party to the Provisional Agreement on the Industrial Property Protection, as signed in Minsk on Dec. 27, 1991, are applied in the territory of the Russian Federation.

According to the Provisional Agreement, the Russian Federation, as well as the other States party to it, recognizes the validity of titles of protection issued earlier pursuant to the USSR Laws in the territory of the Russian Federation.

Rospatent has submitted to the Government of the Russian Federation its proposals on issuing a normative act which is to certify the adoption by the Russian Federation of the said obligations arising out of the Provisional Agreement.

2. The applicants, who have filed applications for inventions, industrial designs and trademarks with the former USSR Gospatent, may, without losing the priority dates, wait until the Provisional Agreement on the Industrial Property Protection becomes effective, the Interstate Patent Office is established and its working procedures for issuing interstate titles of protection are elaborated.

3. In accordance with the abovesaid proposals by Rospatent, as submitted to the Government of the Russian Federation, any applicant wishing to obtain a patent (a trademark certificate) of the Russian Federation will be given the right to seek, on the basis of an application filed, for provisional protection in the territory of the Russian Federation.

Such provisional protection will be granted to inventions, industrial designs and trademarks claimed in the applications in respect of which the examiners have taken decisions on the possibility of issuing patents (certificates), and will last from the date when the data on an application are published in a special gazette to the date of issuance of a patent (certificate) of the Russian Federation.

The provisional protection in the territory of the Russian Federation will not impose legal barriers to obtaining, by the applicant, an interstate patent (certificate) after the Provisional Agreement on the Industrial Property Protection becomes effective. The priority date will still be considered as the date of filing the application either with the former USSR Gospatent or with Rospatent, with due regard to the conventional priority.

4. According to the Provisional Agreement on the Industrial Property Protection signed on Dec. 27, 1991, an inventor's certificate issued in the former USSR may not be exchanged for patents of the individual States party to the Provisional Agreement. The question of exchanging inventor's certificates for interstate patents will be finally resolved in the course of developing and concluding an Interstate Convention.

In this connection, Rospatent does not exchange inventors' certificates for patents if a petition to this extent was filed after Dec. 27, 1991.

V. Rassokhin
Chairman of Rospatent

Copies of unofficial translations of the draft laws referred to in the statement are available from Box 4, U.S. Patent and Trademark Office, Washington, DC 20231. The charge is \$4.00 to cover the cost of duplication. Checks should be made payable to the Commissioner of Patents and Trademarks.

(189) Regarding Industrial Property Protection in Ukraine

The following announcement of Ukraine was furnished by the World Intellectual Property Organization of Geneva, Switzerland.

**ANNOUNCEMENT ON THE PROVISIONAL
REGULATION CONCERNING THE LEGAL
PROTECTION OF INDUSTRIAL PROPERTY
IN UKRAINE**

The President of Ukraine, by his Decree of Sept. 18, 1992, approved the Provisional Regulation on Legal Protection of Objects of Industrial Property and Rationalization Proposals in Ukraine ("Regulation"). The Regulation entered into force on Sept. 18, 1992.

The situation of industrial property protection in Ukraine, as resulting in particular from the transitional provisions of the Regulation, is summarized below.

**I. The Transitional Provisions Concerning Priority and, in
Respect of Applications for Patents of Inventions, the
Carrying Out of Examination**

(1) Any priority claimed within six months from the entry into force of the Regulation, i.e. until Mar. 18, 1993, on the basis of the first filing in a State party to the Paris Convention for the Protection of Industrial Property, will be recognized even if it is claimed after twelve months from the first filing in the case of patents for inventions, or six months from the first filing in the case of industrial designs or trademarks, provided that it is claimed not later than twenty-seven months from the first filing in the case of patents for inventions, or not later than twenty-one months from the first filing in the case of industrial designs and trademarks.

(2) The applicant or any other person may submit to the State Patent Office of Ukraine within five years from the filing date a request for the substantive examination of an application for a patent for invention. The request must be accompanied by a search report established by an International Searching Authority under the Patent Cooperation Treaty (PCT) or an organization registered with the State Patent Office of Ukraine as a Searching Authority, or by evidence

that an action to grant a patent has been taken by a Patent Office which has a substantive examination system for granting patents.

II. Applications for Industrial Property Rights Filed with the Patent Office of the Soviet Union

(3) An applicant of an application for a patent for invention, for an inventor's certificate, for an industrial design patent or certificate or for a trademark certificate filed with the Patent Office of the Soviet Union may request the State Patent Office of Ukraine within six months from the date of entry into force of the Regulation, i.e., until Mar. 18, 1993, that the said application be further processed according to the Regulation. The request must be accompanied by a copy of said application, including a copy of the request showing the filing date as sent back by the Patent Office of the Soviet Union to the applicant, and by any available evidence showing that the said application still had effect on Dec. 24, 1991. The filing date and any priority date of the said application will be maintained.

III. Industrial Property Rights Granted by the Patent Office of the Soviet Union

(4) Patents for inventions, industrial design patents and trademark certificates granted by the Patent Office of the Soviet Union prior to Dec. 25, 1991, will, after their registration by the State Patent Office of Ukraine at the request of the owner and upon furnishing of a document for payment of the prescribed fee (see paragraph (11), below), be considered as having the same effects for the remaining period of their validity as a patent for invention, industrial design patent or trademark certificate granted in accordance with the Regulation by the State Patent Office of Ukraine. The duration of the said validity is 20 years from the filing date of the application in the case of a patent for invention, 15 years from the filing date of the application in the case of an industrial design patent and, in the case of a trademark certificate, 10 years from the filing date of the application (if the period of validity of the certificate had not yet been extended by Dec. 24, 1991) or from the date of the request for extension of the period of validity (if the period of validity of the certificate had already been extended by Dec. 24, 1991). The request must be filed within six months from the date of entry into force of the Regulation, i.e., until Mar. 18, 1993, and must be accompanied by a copy of the patent or certificate granted by the Patent Office of the Soviet Union.

(5) As regards inventors' certificates and industrial design certificates granted by the Patent Office of the Soviet Union in relation to which a 20-year term in the case of inventions, or a 15-year term in the case of industrial designs, both counted from the filing date of the application, has not expired before the entry into force of the Regulation, i.e., prior to Sept. 18, 1992, the State Patent Office of Ukraine will grant, at the request of the inventor (inventors) and with the consent of the applicant, a Ukrainian patent to the inventor himself, or to any other physical or legal person, with their consent, indicated in the request, or to the Ukrainian Inventions Foundation. In the case of inventions, if the said request is not made within the period of one year after the entry into force of the Regulation, i.e., until Sept. 18, 1993, inventors' certificates granted by the Patent Office of the Soviet Union shall be exchanged for Ukrainian patents granted to the Ukrainian Inventions Foundation. Any Ukrainian patent to which this paragraph applies will be valid until the expiration of 20 years from the filing date of the application in the case of inventions, and 10 years from the filing date of the application, with an opportunity of subsequent extension, upon request of the owner, but not longer than for another 5-year period in the case of industrial designs.

IV. Effects in Ukraine of International Applications under the Patent Cooperation Treaty (PCT)

(6)(a) On Sept. 21, 1992, Ukraine deposited a declaration of continuation the effect of which is that the Patent Cooperation Treaty (PCT) is applied by Ukraine. Nationals and residents of Ukraine can therefore file international applications, and Ukraine can be designated and elected in international applications filed, from that date.

(b) On Sept. 29, 1992, the Assembly of the PCT Union adopted, with effect on Oct. 1, 1992, new Rules 32.1 and 32.2 in

the Regulations under the PCT, concerning the extension of international applications to certain successor States.

(c) For the purpose of determining the status of international applications with respect to Ukraine, one has to distinguish between

- (i) international applications designating the Soviet Union which were filed prior to Dec. 25, 1991 (see (d), below);
- (ii) international applications—irrespective of the designations, they contain—which were filed between Dec. 25, 1991, and Nov. 23, 1992 (see (e) to (g), below);
- (iii) international applications designating Ukraine filed on or after Sept. 21, 1992 (see (h), below).

(d) As regards any international application whose international filing date is prior to Dec. 25, 1991, and in which the Soviet Union has been designated, the "national filing effect" of any such application under Article 11(4) of the PCT will, pursuant to the deposit by Ukraine of its declaration of continuation, be recognized in Ukraine (provided that the international application has not lost its effect in the Soviet Union by Dec. 24, 1991). The conditions under which any such international application, or any patent or inventor's certificate resulting therefrom and granted by the Patent Office of the Soviet Union, may continue to have effect in Ukraine are the following:

- (i) if a patent for invention or an inventor's certificate has been granted by the Patent Office of the Soviet Union on the basis of the international application, the conditions described in paragraphs (4) and (5), above, are applicable;
- (ii) if the applicant has entered the national phase before the Patent Office of the Soviet Union but a patent for invention or an inventor's certificate had not been granted by the Patent Office of the Soviet Union without the application having been rejected by that Office, the applicant must, until Mar. 18, 1993,

—furnish to the State Patent Office of Ukraine a copy of the Russian translation submitted to the Patent Office of the Soviet Union and any available evidence showing that the application still had effect on Dec. 24, 1991,

—file the request referred to in paragraph (3), above, with the State Patent Office of Ukraine, and

—furnish to the State Patent Office of Ukraine a document for payment of the prescribed fee (see paragraph 11, below);

- (iii) if the applicant has not entered the national phase before the Patent Office of the Soviet Union and the time limit for entering the national phase before that Office had not expired on Dec. 24, 1991, the applicant must, until Mar. 18, 1993, furnish to the State Patent Office of Ukraine a translation of the international application into Ukrainian or Russian and a document for payment of the prescribed fee (see paragraph 11, below).

(e) As regards any international application whose filing date is later than Dec. 24, 1991, and earlier than Nov. 24, 1992, its effects may be extended to Ukraine (irrespective of the designations it contains) through the performance by the applicant of the following acts:

With the exception of any such international application whose international filing date is later than Sept. 21, 1992, and in which Ukraine has been designated under Rule 4.9(a) of the Regulations under the PCT: in such a case, the procedure described in (e) to (g) is not applicable, and the procedure described in (h) is applicable. It should be noted that only those international applications filed on or after Sept. 21, 1992, can specifically designate Ukraine.

(i) filing with the International Bureau of the World Intellectual Property Organization (WIPO) a request for extension;

(ii) paying to the International Bureau of WIPO an extension fee of 185 Swiss francs, payable in Swiss francs.

(f) The applicant in respect of each and every international application referred to in (e), above, or his agent or common representative if there is one, will receive a written notification from the International Bureau of WIPO calling his attention to the fact that he can, by filing a written request for extension, extend the effects of the international application to Ukraine. The

notification will, in particular, specify the modes of payment of the extension fee of 185 Swiss francs. The request for extension must contain the identification of the international application by its international application number. A form which may be used for the purpose of requesting the extension to Ukraine will be attached to the notification. The request for extension must be in English or French, and may be sent by telefax or telex. The request for extension and the corresponding payment must reach the International Bureau of WIPO before the expiration of three months from the date of the notification sent by the International Bureau of WIPO; if either the request or the fee is received later, the request will be refused. It is recommended that applicants await the notification from the International Bureau of WIPO and use the form attached to it, but requests and payments may be made without waiting for the notification from the International Bureau of WIPO.

(g) If the conditions described in (e) and (f), above, are fulfilled, Ukraine will be considered as having been designated in the international application on its international filing date. For entering the national phase before the State Patent Office of Ukraine, the applicant must furnish to that Office a translation of the international application into Ukrainian or Russian and a document for payment of the prescribed fee (see paragraph 11, below) until Dec. 31, 1993, or within the following time limit if that time limit expires after Dec. 31, 1993:

- (i) before the expiration of 21 months from the priority date if Ukraine is not elected under Chapter II of the PCT within 19 months from the priority date;
- (ii) before the expiration of 31 months from the priority date if Ukraine is elected under Chapter II of the PCT within 19 months from the priority date.

(h) As regards any international application whose international filing date is later than Sept. 20, 1992, and in which Ukraine has been designated, the applicant, in order to enter the national phase before the State Patent Office of Ukraine, must furnish to that Office a translation of the international application into Ukrainian or Russian and a document for payment of the prescribed fee (see paragraph 11, below) to that Office within the following time limit:

- (ii) before the expiration of 31 months from the priority date if Ukraine is not elected under Chapter II of the PCT within 19 months from the priority date.

V. Effects in Ukraine of International Registrations under the Madrid Agreement Concerning the International Registration of Marks

(7)(a) On Sept. 21, 1992, Ukraine deposited a declaration of continuation the effect of which is that the Madrid Agreement Concerning the International Registration of Marks is applied by Ukraine.

(b) On Sept. 29, 1992, the Assembly of Madrid Union adopted, with effect on Oct. 1, 1992, a new Rule 38 in the Regulations under the Madrid agreement, concerning the effect of international registrations in certain successor States.

(c) Pursuant to the deposit of the declaration of continuation and to the decision of the Assembly, certain international registrations may have effect in Ukraine subject to the conditions described below. Those international registrations are those which have territorial extension to the Soviet Union effective from a date prior to Dec. 25, 1991.

(d) The conditions referred to above are the following:

- (i) the filing with the International Bureau of the World Intellectual Property Organization (WIPO) of a request;
- (ii) the payment to the International Bureau of WIPO of a fee, the amount of which is 62 Swiss francs per international registration.

(e) The owner of each and every international registration concerned, or his representative (if the owner has a representative whose name appears in the International Register), will receive a written notice from the International Bureau of WIPO calling his attention to the fact that he can, by filing a written request, continue the effect of the international registration to Ukraine. The notice will, in particular, specify the modes of payment of the fee. The request must contain

the identification of the international registration concerned by its international registration number. A form (in French) will be attached to the notice and may be used. The request must be in English or French, and may be sent by telefax or telex. The request and the corresponding payment must reach the International Bureau of WIPO before the expiration of six months from the date of the notice sent by the International Bureau of WIPO; if either the request or the fee is received later, the request will be refused. Requests and payments may be made without waiting for the notice of the International Bureau of WIPO.

(f) If the conditions described above are fulfilled, the international registration concerned will, with respect to Ukraine, have effect as from the effective date of the territorial extension to the Soviet Union and benefit from any priority validly claimed in regard to such extension.

(g) For each international registration which has no territorial extension to the Soviet Union or whose international registration date is later than Dec. 24, 1991, protection in Ukraine can only be obtained by filing, through the intermediary of the national Office of the country of the owner, a request for territorial extension under Rule 20 of the Regulations under the Madrid Agreement. It is to be noted that requests for territorial extension to Ukraine are possible at present.

VI. Prior User Right

(8) Enterprises, organizations and institutions which have already started to use inventions or industrial designs for which protection can be obtained according to paragraph (5), above, prior to the entry into force of the Regulation, i.e., prior to Sept. 18, 1992, will have the right to a continued use of such inventions and industrial designs, but without increasing the volume of their utilization.

VII. New Applications

(9) From the date of entry into force of the Regulation, i.e., from Sept. 18, 1992, onward, applications for patents for inventions, for industrial design patents and for trademark certificates can be filed with the State Patent Office of Ukraine. The request as a part of the application must be filed in Ukrainian and be accompanied on the filing date by the prescribed fees. The following announcements concerning industrial property protection in the Czech Republic and the Slovak Republic were furnished by the World Intellectual Property Organization (WIPO).

Announcement on the Protection of Industrial Property in the Czech Republic

In view of the fact that Czechoslovakia ceased to exist on Dec. 31, 1992, and that the Czech Republic and the Slovak Republic became independent States on Jan. 1, 1993, the situation of industrial property protection in the Czech Republic is summarized below.

I. Legal Basis

(1) The respective legal acts on the protection of industrial property of Czechoslovakia remain applicable in the Czech Republic.

II. Applications for Industrial Property Rights Filed with the Federal Office for Inventions of Czechoslovakia and Industrial Property Rights Granted by that Office,

(2) Applications for industrial property rights filed with the Federal Office for Inventions of Czechoslovakia and industrial property rights granted by that Office maintain their legal effect in both the Czech Republic and the Slovak Republic, it being understood that the next fees which are to be paid must be paid, for protection in both the Czech Republic and the Slovak Republic, to both the Industrial Property Office of the Czech Republic and the Industrial Property Office of the Slovak Republic.

III. International Treaties

(3) The Czech Republic has deposited, with effect on Jan. 1, 1993, a declaration the effect of which is that all those treaties administered by WIPO to which Czechoslovakia was party continue to be applicable as far as the Czech Republic is concerned. Those treaties are: the Convention Establishing the World Intellectual Property Organization, the Paris Convention for the Protection of Industrial Property, the Madrid Agreement for the Repression of False or Deceptive Indications of Source on Goods, the Madrid Agreement Concerning the International Registration of Marks, the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks, the Lisbon Agreement for the Protection of Appellations of Origin and their International Registration, the Locarno Agreement Establishing an International Classification for Industrial Designs, the Patent Cooperation Treaty (PCT), the Strasbourg Agreement Concerning the International Patent Classification, the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure, the Berne Convention for the Protection of Literary and Artistic Works, and the Treaty on the International Registration of Audiovisual Works.

IV. Effects in the Czech Republic of International Applications under the Patent Cooperation Treaty (PCT)

(4)(a) Pursuant to the deposit of the declaration of continuation referred to in paragraph (3), above, nationals and residents of the Czech Republic can file international applications, and the Czech Republic can be designated and elected in international applications filed, on or after Jan. 1, 1993.

(b) Rules 32.1 and 32.2 of the Regulations under the PCT permit the extension of international applications to the Czech Republic.

(c) For the purpose of determining the status of international applications with respect to the Czech Republic, one has to distinguish between

(i) international applications specifically¹ designating Czechoslovakia which were filed prior to Jan. 1, 1993 (see (d), below);

(ii) international applications not specifically¹ designating the Czech Republic—irrespective of the other designations

they contain—filed between Jan. 1, 1993, and Feb. 21, 1993 (see (e) to (g) below);

(iii) international applications specifically¹ designating the Czech Republic filed on or after Jan. 1, 1993 (see (h) below).

(d) As regards any international application whose international filing date is prior to Jan. 1, 1993, and in which Czechoslovakia is specifically designated, the "national filing effect" of any such application under Article 11(4) of the PCT will, pursuant to the deposit by the Czech Republic of its declaration of continuation, be recognized in the Czech Republic (provided that the international application had not lost its effect in Czechoslovakia by Dec. 31, 1992). The conditions under which any such international application, or any patent resulting therefrom and granted by the Federal Office for Inventions of Czechoslovakia, may continue to have effect in the Czech Republic are the following:

(iii) if the applicant has not entered the national phase before the Federal Office for Inventions of Czechoslovakia and the time limit for entering the national phase had not expired on Dec. 31, 1992, the applicant must, before the expiration of the applicable time limit under PCT Article 22 or 39(1), furnish to the Industrial Property Office of the Czech Republic a translation of the international application into the Czech language and pay the prescribed fee.

(e) As regards any international application whose international filing date is later than Dec. 31, 1992, and earlier than Feb. 22, 1993,² and in which the Czech Republic is not specifically designated, its effects may be extended to the Czech Republic (irrespective of the other designations it contains) through the performance by the applicant of the following acts:

(i) filing with the International Bureau of the World Intellectual Property Organization (WIPO) a request for extension;

(ii) paying to the International Bureau of WIPO an extension fee of 185 Swiss francs, payable in Swiss francs.

(f) The applicant in respect of each and every international application referred to in (e), above, or his agent or common representative if there is one, will receive a written notification from the International Bureau of WIPO calling his attention to the fact that he can, by filing a written request for extension, extend the effects of the international application to the Czech Republic. It is recommended that applicants await the notification from the International Bureau of WIPO and use the form attached to it, but requests and payments may be made without waiting for the notification from the International Bureau of WIPO.

(g) If the condition described in (e) and (f), above, are fulfilled, the Czech Republic will be considered as having been designated in the international application on its international

¹ In this announcement, an international application is regarded as "specifically" designating a State either if that State has been designated under Rule 4.9(a) of the Regulations under the PCT or if the designation of that State has been confirmed under Rule 4.9(c) of those Regulations.

The conditions under which any such international application, or any patent or inventor's certificate resulting therefrom and granted by the Patent Office of the Soviet Union or by the Patent Office of the Russian Federation, may continue to have effect in Kazakhstan are the following:

(i) if a patent for invention or an inventor's certificate has been granted by the Patent Office of the Soviet Union or by the Patent Office of the Russian Federation on the basis of international application, the conditions referred to in paragraph (6) above, are applicable;

(ii) if the applicant has entered the national phase before the Patent Office of the Soviet Union or the Patent Office of the

Russian Federation but a patent for invention or an inventor's certificate has not been granted by any of those Offices, the conditions referred to in paragraph (7), above, are applicable, provided that the applicant must, before Dec. 1, 1993, file with the National Patent Office of Kazakhstan a request that the international application be further processed according to the Kazakh legislation; the request must be accompanied by a copy of the Russian translation of the international application submitted to the Patent Office of the Soviet Union or the Patent Office of the Russian Federation and a declaration that the application is still pending before the Patent Office of the Russian Federation; however where a decision to grant a patent has issued, only the requirements referred to in paragraph (8), above, apply;

It is recommended that applicants await the notification from the International Bureau of WIPO and use the form attached to it, but requests and payments may be made without waiting for the notification from the International Bureau of WIPO.

(g) If the conditions described in (e) and (f), above, are fulfilled, Kazakhstan will be considered as having been designated in the international application on its international filing date. For entering the national phase before the National Patent Office of Kazakhstan, the applicant must furnish, within the following time limit, to that Office both a translation of the international application into Kazakh or Russian and evidence that the prescribed fee (see paragraph (12), below) was paid:

(i) before Dec. 1, 1993, or the expiration of 21 months from the priority date, whichever is later, if Kazakhstan is not elected under Chapter II of the PCT before the expiration of 19 months from the priority date and item (iii) does not apply;

(iii) before Dec. 1, 1993, or the expiration of 31 months from the priority date, whichever is later, if a request for extension to Kazakhstan is made after, but the demand was made before, the expiration of 19 months from the priority date, and a later election of Kazakhstan is made together with the request for extension or within three months from the date of the request for extension.

On Dec. 1, 1991, the State Patent Bureau has proceeded the registration of Company Names of the Republic of Lithuania under the Regulations of Company Names.

Since Apr. 30, 1992 the Republic of Lithuania is a member of the World Intellectual Property Organization (WIPO).

TMIn order to ensure legal protection of industrial property (inventions, industrial designs and trademarks), rights of inventors, patent owners and investors on May 20, 1992 the Government of the Republic of Lithuania adopted a Decree No 362 on provisional measures until the laws of the Republic of Lithuania on inventions, industrial designs and trademarks are adopted. The contents of the provisional measures and their main consequences are summarized below.

INDUSTRIAL PROPERTY RIGHTS GRANTED BY THE PATENT OFFICE OF THE FORMER SOVIET UNION

1. Valid patents for inventions, as well as valid inventor's certificates, granted by the Patent Office of the former Soviet Union on the basis of applications filed beginning with Jan. 1, 1978, shall be registered as patents of the Republic of Lithuania for a period not longer than 15 years from the date of filing an application, provided that the inventor together with the applicant or the patent owner files a request to that effect with the State Patent Bureau no later than Sept. 30, 1993 and pays the pre-

scribed State fee. Failing such a request, the patent or inventor's certificate will not have any effect in the Republic of Lithuania.

2. Industrial design for which valid industrial design patent or industrial design certificates granted by the Patent Office of the former Soviet Union on the basis of applications filed beginning with Jan. 1, 1983 shall be registered as industrial designs in the Republic of Lithuania for a period of 5 years with a possibility of renewing the registration for 5 consecutive years but not longer than for a period of 10 years from the date of filing an application provided that the creator of the industrial design together with the applicant or the patent owner files a request to that effect with the State Patent Bureau not later than Sept. 30, 1993 and pays the prescribed State fee. Failing such a request, the industrial design patent or certificate shall not have any effect in Lithuania.

3. A patent or industrial design, which has been registered under paragraph 1 or 2 above, will have no effect against any person who in the Republic of Lithuania, prior to the date of the request for registration was using the invention or industrial design protected by inventor's certificate or certificate or was making effective and serious preparation for such use.

4. Trademarks for which valid trademark certificates were granted by the Patent Office of the former Soviet Union shall be registered as trademarks in the Republic of Lithuania for a period of 10 years, provided that the owner of the trademark certificate files a request to that effect with the State Patent Bureau not later than Sept. 30, 1993 and pays the prescribed State fee. The same applies to international trademark registration effected under Madrid Agreement concerning the International Registration of Marks, for which valid trademark certificates had the territorial extension to the Former Soviet Union. Failing such a request, the trademark certificate will not have any effect in the Republic of Lithuania.

5. Priority rights may be claimed from May 20, 1992 onwards, but not later than Apr. 30, 1993, on the basis of previous patents, industrial design and trademark applications filed with the Patent Office of the former Soviet Union after Jan. 1, 1990, and which were pending on Jan. 31, 1992. Such priority rights are governed by the provisions of Article 4 of the Paris Convention for the Protection of Industrial Property.

6. Information regarding patents for inventions and industrial designs and trademark certificates shall be published in the OFFICIAL GAZETTE of the State Patent Bureau of the Republic of Lithuania.

NEW APPLICATIONS FOR INDUSTRIAL PROPERTY RIGHTS FILED WITH THE STATE PATENT BUREAU OF THE REPUBLIC OF LITHUANIA

7. Pending the enactment of industrial property legislation in Lithuania, it is possible to file patent applications and applications for the registration of industrial designs and of trademarks with the State Patent Bureau on the basis of legal acts of the Republic of Lithuania.

Foreign natural and legal persons, having their ordinary residence or principle place of business outside Lithuania, shall file requests and applications only through a patent attorney, registered in the Register of patent attorneys of the Republic of Lithuania."

Copies of the list of fees of the State Patent Bureau of the Republic of Lithuania and of the list of registered patent attorneys are available from Box 4, U.S. Patent and Trademark Office, Washington, D.C. 20231

(194) Regarding Industrial Property Rights in the Republic of Slovenia

The Industrial Property Protection Office of the Republic of Slovenia has provided the U.S. Patent and Trademark Office (USPTO) with a consolidated text, in English, of the Law on

Industrial Property of the Republic of Slovenia which regulates the grant and protection of patents, model rights and design rights, trademarks and service marks, and appellations of origin. In addition, the Industrial Property Protection Office has notified the USPTO that it has entered into an "extension agreement" with the European Patent Organisation that will enter into force in January 1994. After entry into force of the agreement, it will be possible to obtain patent protection in Slovenia through obtaining a European patent. The Republic of Slovenia also plans to ratify the Patent Cooperation Treaty administered by the World

Intellectual Property Organization.

A copy of the consolidated text of the Slovenian industrial property law can be obtained by writing to the U.S. Patent and Trademark Office, Box 4, Washington, D.C. 20231.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office will be sending out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994.

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is important that patent practitioners complete each survey form no later than the time of response to the Office action being surveyed. To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for the patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. CL." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
